

**TROPICAL CYCLONE BULLETIN NO. 18**  
**Severe Tropical Storm PAENG (NALGAE)**

Issued at 2:00 PM, 29 October 2022

Valid for broadcast until the next bulletin at 5:00 PM today

**“PAENG” BEGINS TO MOVE WEST NORTHWESTWARD AND IS ABOUT TO MAKE LANDFALL IN THE VICINITY OF SAN JUAN, BATANGAS**

**Location of Center (1:00 PM):**

The center of Severe Tropical Storm “PAENG” was estimated based on all available data including those from Tagaytay Doppler Weather Radar **over the coastal waters of San Juan, Batangas (13.7°N, 121.5°E)**

**Intensity:**

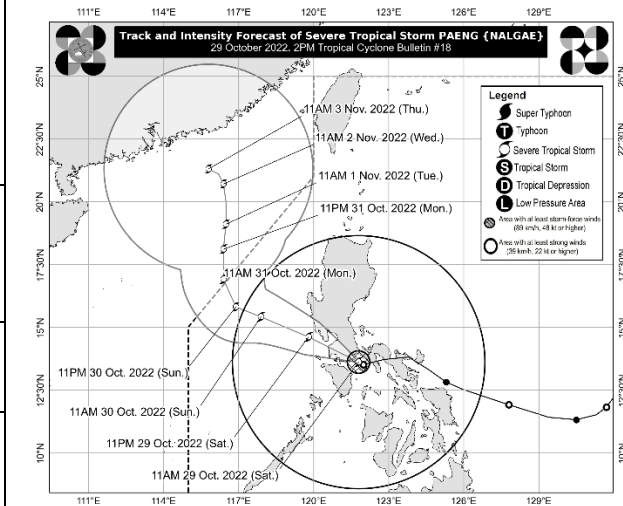

Maximum sustained winds of **95 km/h** near the center, gustiness of up to **130 km/h**, and central pressure of **985 hPa**

**Present Movement:**

**West northwestward at 15 km/h**

**Extent of Tropical Cyclone Winds:**

**Strong to storm-force winds** extend outwards up to **560 km** from the center

**TRACK AND INTENSITY FORECAST**

**TROPICAL CYCLONE BULLETIN NO. 18**  
**Severe Tropical Storm PAENG (NALGAE)**

Issued at 2:00 PM, 29 October 2022

Valid for broadcast until the next bulletin at 5:00 PM today

**HAZARDS AFFECTING LAND AREAS**

**Heavy Rainfall**

- *Today:* Heavy to intense with at times torrential rains likely over Metro Manila, CALABARZON, Bicol Region, Marinduque, Romblon, Mindoro Provinces, and the northern portion of Palawan including Calamian and Cuyo Islands. Moderate to heavy with at times intense rains likely over mainland Cagayan Valley, Cordillera Administrative Region, Western Visayas, and Central Luzon. Light to moderate with at times heavy rains possible over the rest of Luzon and Visayas.
- *Tomorrow:* Moderate to heavy with at times intense rains likely over Zambales, Bataan, and Ilocos Region. Light to moderate with at times heavy rains possible over Metro Manila, MIMAROPA, CALABARZON, and the rest of Central Luzon.
- Under these conditions, **widespread flooding and rain-induced landslides are expected**, especially in areas that are highly or very highly susceptible to these hazard as identified in hazard maps and in localities with significant antecedent rainfall.

**Severe Winds**

- Winds of at most storm-force strength may occur within any of the areas where Wind Signal No. 3 is hoisted, while winds reaching gale-force strength are possible within any of the areas where Wind Signal No. 2 is in effect. Areas under Wind Signal No.1 may experience strong winds (strong breeze to near gale strength) throughout the passage of the tropical cyclone.
- The surge of the Northeast Monsoon enhanced by PAENG will also bring strong winds with gusts reaching gale-force strength over Batanes, Babuyan Islands, Ilocos Norte, the northern and eastern portions of mainland Cagayan, and the northern portion of Apayao.

**Coastal Inundation**

There is minimal to moderate risk of storm surge of up to 2.0 m in height which may cause **inundation or flooding in the low-lying and exposed coastal areas** of western Pangasinan, Zambales, Bataan, southern Aurora, Quezon including Polillo Islands, Bulacan, Metro Manila, Cavite, Batangas, Marinduque, Camarines Norte, Camarines Sur, and Albay. For more information refer to Storm Surge Warning #5 issued at 8:00 AM today.

**HAZARDS AFFECTING COASTAL WATERS**

Under the influence of the surge of the Northeast Monsoon and Severe Tropical Storm PAENG, a **marine gale warning** remains in effect over the seaboard of Luzon and Visayas and the eastern seaboard of Mindanao. For more information, refer to Gale Warning #12 issued at 5:00 AM today.

**TRACK AND INTENSITY OUTLOOK**

- Severe Tropical Storm PAENG is forecast to track west northwestward through Sunday. On the forecast track, the center of PAENG will make landfall in the vicinity of San Juan, Batangas before traversing the Cavite-Metro Manila-Bataan Peninsula area for the remainder of the day.
- Due to frictional effects, PAENG may weaken into a tropical storm while moving over the Luzon landmass. However, PAENG may re-intensify into a severe tropical storm once it reaches the West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
